

Glamping Pods

Timber Glamping Pods

Outside
Structure
SoLutions 

Designed and made in Latvia using high quality Thermowood (heat and steam-treated Siberian Pine).

Our Glamping Pods come with three rooms, providing flexible self-contained accommodation for year-round use.

The bedroom features large picture windows with a custom-made timber bed.

The kitchen has a ceramic hob, fridge and sink set into a Thermowood worktop with a large picture window.

The bathroom has a flush toilet, sink and shower with an electric water heater.

- Our Glamping Pod is 6m long and 2.45m wide with three rooms.
- The bedroom has a custom-build wooden bed with a mattress and a small side table.
- The kitchen has a Thermowood kitchen with fitted ceramic hob, sink and under-counter fridge.
- Constructed using 45mm thick Thermowood, heat treated Siberian Pine, for longevity.
- High specification includes triple glazed windows in bedroom, kitchen and bathroom with part-glass external door

Services

As standard the Glamping Pod will come with a fully tested 230v electrical system running from a distribution board.. Sockets are fitted in the kitchen and bedroom with an 80L electric water heater in the bathroom. LED lighting is provided throughout. Mains water system with hot and cold water to bathroom (toilet, basin and shower) and to the kitchen sink. Standard flush toilet in the bathroom. Everything is ready to connect to your own services.
